

SiSiB® PF2131-200 Silicone Fluid

INTRODUCTION

SiSiB® PF2131-200 is a colorless to slightly yellow transparent liquid. It is a polydimethylsiloxane functionalized with a trimethoxysilyl group at one end and a vinyl dimethylsilyl group at the other.

CHEMICAL STRUCTURE

PHYSICAL PROPERTIES

Color	Colorless to yellowish
Appearance	Clear liquid
Viscosity (25°C, cP)	180-350
Density (25°C)	0.97-1.00

APPLICATIONS

In room temperature vulcanizing (RTV) silicone rubbers and addition-cure encapsulants or sealants, SiSiB® PF2131-200 is used as a reactive diluent to partially replace conventional polydimethylsiloxane fluids. It effectively reduces silicone oil migration and significantly enhances adhesion to various substrates.

PACKING

SiSiB® PF2131-200 fluid is supplied in 200Kg steel drum.

HANDLING

This document does not contain the product safety information required for safe use. Before handling, please refer to the product and safety data sheets, as well as container labels, for information on safe usage, physical hazards, and health risks. Safety Data Sheet is available on the website, from the distributor, or by contacting SiSiB customer service.

STORAGE

In the original unopened packaging, SiSiB® PF2131-200 fluid has a shelf life of 9 months in a dry and cool place.
