

## SiSiB® PC16348 Silicone Elastomer Blend

### INCI NAME

Dimethicone (and) Dimethicone Crosspolymer

### INTRODUCTION

SiSiB® PC16348 is a high molecular weight silicone crosslinked copolymer dispersed in low-viscosity polydimethylsiloxane. It offers a soft, silky, powdery feel that is non-greasy, non-sticky, with good spreadability and a light elastic finish.

When used in primers and foundations, SiSiB® PC16348 significantly improves the spreadability of the product, making makeup easier to apply, more comfortable, and more natural. It also helps absorb excess sebum, providing an oil-controlling effect that keeps makeup clean and long-lasting.

In skincare formulations, it helps reduce overall viscosity, imparts a silky, pleasant skin feel, and leaves the skin soft and smooth. In sunscreen products, it reduces greasiness and enhances the application experience and spreadability.

With a matte effect and strong water resistance, SiSiB® PC16348 helps prevent shrinkage in lipsticks and similar formulations, offering a more moisturized feel. It can also be used as a binder in powder cosmetics to improve product cohesion and wear.

### ADVANTAGES

- Moisturizing, silky, soft with a powdery texture
- Film forming sensation, improving product moisturizing performance
- Durable matte effect
- Absorb the oil secreted by the skin, control oil
- No greasy feeling
- Can reduce the stickiness in the formula
- Covering small wrinkles
- Can increase formula viscosity
- Strong water resistance
- Easy to formulate, both cold and hot

### PHYSICAL PROPERTIES

|                         |                                |
|-------------------------|--------------------------------|
| Appearance              | Transparent to translucent gel |
| Specific gravity (25°C) | 0.96                           |
| Viscosity (mPa·s)       | 150,000-600,000                |

### BENEFITS & APPLICATIONS

SiSiB® PC16348 can be used to formulate water-in-oil, oil-in-water, and water-in-silicone systems. It is also suitable for the preparation of anhydrous products.

Common applications of SiSiB® PC16348 include:

- Skin care products
- Cosmetics and sunscreen formulations
- Antiperspirants and deodorants

SiSiB® PC16348 silicone elastomer gel should be added to the formulation along with the oil or silicone phase. It is important to ensure that the elastomer is fully dispersed within the oil phase before further processing.

### RECOMMENDED DOSAGE

The recommended usage level is 2%-80%.

### PACKING

SiSiB® PC16348 is available in 20Kg or 180kg drum.

### HANDLING

This document does not contain the product safety information required for safe use. Before handling, please refer to the product and safety data sheets, as well as container labels, for information on safe usage, physical hazards, and health risks. Safety Data Sheet is available on the website, from the distributor, or by contacting SiSiB customer service.

### STORAGE

When stored in the original unopened container at or below 50°C, SiSiB® PC16348 has a shelf life of 24 months from the date of production.

### LIMITATIONS

This product is neither tested nor represented as suitable for medical or pharmaceutical uses.
