SAFETY DATA SHEET

POWSIL[™] 59335

Version 6.1S	Page 1 / 10	Revision Date 06.01.2021

SECTION 1: Identification of the substance/mixture and of the company

Product Identifier				
Product Name:	POWSIL™ 59335			
Relevant identified uses of the substance or mixture and uses advised against				
Relevant applications identified	For industrial use			
Details of the supplier of the safety data sheet				
Company	Nanjing SiSiB Silicones Co., Ltd.			
	Guanghua Sci & Tech Industrial Zone,			
	No. 104, Guanghua Road, Nanjing 210007, P.R.China			
	Email: SDS@SiSiB.com			
Emergency Telephone Number:	+86-25-8468-0091			

SECTION 2: Hazardous identification

Summary of hazard in an emergency situation					
Liquid. Mixes with water. Irritating to e	eyes.				
Classification of hazards					
Skin Corrosion/Irritation	Category 2				
Eye Irritation	Category 2A				
Acute Aquatic Hazard	Category 2				
Label elements					
Pictogram	\mathbf{V}				
Signal word	Warning				
Hazard statement(s)					
H315	Causes skin irritation.				
H319	Causes serious eye irritation.				
H401	Toxic to aquatic life.				
Precautionary statement(s)					
Precautions					
P273	Avoid release to the environment.				
P280	Wear protective gloves/protective clothing/eye protection/face				
	protection.				
P264	Wash all exposed external body areas thoroughly after handling.				
Incident response					
P305+P351+P338	IF IN EYES: Rinse cautiously with water for several minutes.				
	Remove contact lenses, if present and easy to do. Continue				
	rinsing.				
	J J J J J J J J J J J J J J J J J J J

SECTION 4: First aid measures

Description of first aid measures

Eye contact

Wash out immediately with fresh running water.

Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids.

Seek medical attention without delay; if pain persists or recurs seek medical attention.

Removal of contact lenses after an eye injury should only be undertaken by skilled personnel.

Skin contact

Immediately remove all contaminated clothing, including footwear.

Flush skin and hair with running water (and soap if available).

Seek medical attention in event of irritation.

Inhalation

If fumes, aerosols or combustion products are inhaled remove from contaminated area.

Other measures are usually unnecessary.

Ingestion

Immediately give a glass of water.

First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

Advise for rescue team (PPE requirement for rescue personnel)

Wear portable respiratory protective devices if get into the scene of the accident.

Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

SECTION 5: Firefighting measures

Extinguishing media

Water spray or fog. Foam. Dry chemical powder. BCF (where regulations permit). Carbon dioxide.

Special hazards arising from the substance or mixture

Carbon oxides, silicon oxides

Fire Incompatibility

Avoid contamination with oxidizing agents i.e. nitrates, oxidizing acids, chlorine bleaches, pool chlorine etc. as ignition may result.

Advice for firefighters

Fire Fighting

Alert Fire Brigade and tell them location and nature of hazard.

Wear full body protective clothing with breathing apparatus.

Prevent, by any means available, spillage from entering drains or water course.

Use water delivered as a fine spray to control fire and cool adjacent area.

DO NOT approach containers suspected to be hot.

SAFETY DATA SHEET

POWSIL[™] 59335

Version 6.1S	Page 4 / 10	Revision Date 06.01.2021

Cool fire exposed containers with water spray from a protected location.

If safe to do so, remove containers from path of fire.

Fire/Explosion Hazard

Combustible.

Slight fire hazard when exposed to heat or flame.

Heating may cause expansion or decomposition leading to violent rupture of containers.

On combustion, may emit toxic fumes of carbon monoxide (CO).

May emit acrid smoke.

Mists containing combustible materials may be explosive.

Combustion products include:

May emit corrosive fumes.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

Minor Spills

Clean up all spills immediately.

Avoid contact with skin and eyes, by using protective equipment.

Collect the leakage, place in a suitable, labelled container for waste disposal.

Major Spills

Alert Fire Brigade and tell them location and nature of hazard.

Use protective equipment to avoid contact with skin and eyes.

Contain spill with sand, earth or vermiculite.

Collect recoverable product into labelled containers for recycling.

Collect residues and seal in labelled drums for disposal.

If contamination of drains or waterways occurs, advise emergency services.

Personal Protective Equipment advice is contained in Section 8 of the SDS.

Measures for Preventing Secondary Contamination

Refer to section above

Environmental precautions:

See section 12

SECTION 7: Handling and storage

Handling Precautions for safe handling Safe handling Avoid all personal contact, including inhalation. Wear protective clothing when risk of exposure occurs.

Use in a well-ventilated area.

Acetic acid	50mg/kg	Not Available

Exposure controls

Appropriate engineering controls

Engineering controls are used to remove a hazard or place a barrier between the worker and the hazard. Well-designed engineering controls can be highly effective in protecting workers and will typically be independent of worker interactions to provide this high level of protection. General exhaust is adequate under normal operating conditions. Local exhaust ventilation may be required in specific circumstances. If risk of overexposure exists, wear approved respirator. Correct fit is essential to obtain adequate protection. Provide adequate ventilation in warehouse or closed storage areas. Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to effectively remove the contaminant. Process controls which involve changing the way a job activity or process is done to reduce the risk.

Personal protection

Eye/face protection Safety glasses with side shields. Chemical goggles. Skin protection See Hand protection below Hands/feet protection Wear chemical protective gloves, e.g. PVC. Wear safety footwear or safety gumboots, e.g. Rubber **Body Protection** See Other protection below Other protection Overalls. P.V.C. apron. Eye wash unit. **Respiratory protection** Not Available

SECTION 9: Physical and Chemical Properties

Information on basic physical and chemical properties

Appearance	Semitransparent to translucent emulsion with blue light.
Odor	Sight odor
Odor threshold	No data available
pH as a solution (1%)	4.0-6.0
Melting point / freezing point (°C)	No data available
Initial boiling point	No data available
and boiling range (°C)	
Flash point (°C)	No data available
Flammability	Not Applicable
Upper Explosive Limit (%)	No data available
Lower Explosive Limit (%)	No data available
Explosive properties	Not explosive
Vapor pressure (kPa)	No data available
Vapor density (Air = 1)	No data available
Relative density (Water = 1)	No data available
Solubility in water (g/L)	Miscible
Partition coefficient	No data available
n-octanol / water	
Auto-ignition temperature (°C)	No data available
Decomposition temperature (°C)	No data available
Critical temperature (°C)	No data available
Critical pressure (kPa)	No data available
Combustion heat	No data available
Evaporation rate	No data available
Viscosity (mPa • s)	<100 cst
VOC (g/L)	No data available

SECTION 10: Stability And Reactivity

Reactivity See section 7 Chemical stability Product is considered stable. Hazardous polymerization will not occur Possibility of hazardous reactions See section 7 Conditions to avoid

No data available					

SECTION 13:Disposal considerations

Waste chemicals

Treatment must be in accordance with applicable Federal, State/Provincial, and Local regulations. Recycle as much as possible, try to avoid and reduce waste.

DO NOT discharge the waste into drains.

Contaminated packing materials

Packaging may contain residual chemicals, Treatment must be in accordance with applicable Federal, State/Provincial, and Local regulations.

Recycle or reuse of cleaned materials should be in accordance with applicable Federal, State/Provincial, and Local regulations.

Precautions for Transport

Attentions of operation, treatment and precautions of workers should be referred to the content of section 7 and section 8.
