

SiSiB[®] MB6050

Silicone Masterbatch

INTRODUCTION

SiSiB[®] MB6050 is an ultra-high molecular weight siloxane polymer dispersed in polypropylene homopolymer. It is designed to be used as additive in polypropylene compatible systems to improve processing and modify surface characteristics.

BENEFITS

- Improved slip properties
- Improved scratch resistance.
- Improved lubricity.
- Reduced coefficient of friction.
- Improved mold-filling and mold release
- Increased fabrication line throughput.
- Reduced energy usage in processing.

TYPICAL PHYSICAL PROPERTIES

Color and Appearance:	White Pellet
Silicone Content :	50%
Resin Base:	PP
Dosage :	0.5-5%
MFI (190°C, 2.16 kg)	10g/10min

APPLICATIONS

SiSiB[®] MB6050 may be processed in the same way as the thermoplastics on which they are based.

SiSiB[®] MB6050 should be blended with virgin polymer pellets to give the desired Siloxane leveling the final product.

SiSiB[®] MB6050 can be added during compounding in a single screw extruder or added at the feed hopper during the injection molding or extrusion.

Recommend dosage:

When added at 0.5% to 2%, it improved processing and flow of the resin, including better

Silicone Masterbatch

mold filling, less extruder torque, internal lubrication, mold release and faster throughput..

When added at higher levels, it improved surface properties, including lubricity, slip, lower COF, scratch resistance and abrasion resistance.

PACKING AND STORAGE

SiSiB[®] MB6050 is supplied in 25Kg craft paper bag.

In the unopened original container SiSiB[®] MB6050 has a shelf life of one year in a dry and cool place.

NOTES
