SiSiB[®] PC12558

Silicone Wax

INCI: PEG-24 Dimethicone

| Relative density (40°C) | 1.05-1.09 |
|--------------------------|-----------|
| Melting point (°C) | 33-40 |
| Flash point (opened cup) | >100°C |
| Active component (%) | 100 |

APPLICATIONS

SiSiB® PC12558 can be used in all kinds of personal care products.

SiSiB® PC12558 has excellent compatibilities with ingredients in formulations when it is used in cosmetics, skin care, hair cares etc.

SiSiB® PC12558 can be soluble in water completely, which could improve humectants and spreading abilities in creams, lotions, deodorant and antisudorific.

SiSiB® PC12558 can increase foam density and stability, having emollient feel to skin and hair and decreasing oily feel of surfactant type lotions when it is used in lotions and shampoo.

SiSiB® PC12558 can improve moisturization and emollient feel in formulations.

□ How to use:

SiSiB® PC12558 is easy to formulate into aqueous systems. It is best to melt the material prior to use in the formulations. The recommended usage level is 4-12% in most applications.

PACKING AND STORAGE

SiSiB® PC12558 is supplied in 20Kg plastic drum.

In the original unopened packaging, SiSiB® PC12558 has a shelf life of 12 months at least in a dry and cool place at room temperature.
